WHAT IT IS TO BE FORTY.

Discover a sprinkle of gray in your beard,
a thinness of crop where the upland is
cleared,
to see how you take to your coppers and
down.
Ah, that's what it is to be forty.
To find that your shadow has portlier grown,
and a double chin is a nuisance to carry of weight
and a hindrance to a practical, businesslike
figure.
Ah, that's what it is to be forty.
To find that your vision is trickier, which once was
clear,
and a hint of a wrinkle is coming to light—
Ah, that's what it is to be forty.
To find that there's no more a party, a dance or a dine-
ing, of course you'll be present, you never
doed.
To find that you're no longer a young man, you're no
longer a young man, you're no longer a young man,
you're no longer a young man, but a crabbled
old man.
Ah, that's what it is to be forty.

Twenty a man dreams of power and fame;
Twenty a man dreams of a soberer fame;
Twenty a man dreams of his visions are over,
and he knows and he feels as he never did
before.
Ah, that's what it is to be forty.

"Were it possible for every voter of the Republic to see for himself the condition and recompense of labor in Europe, the party of free-trade in the United States would not receive the support of one wage-worker between the two oceans."—JAMES G. BLAINE.

THE DIFFERENCE.

The Free Trade papers have much to say about Morton's "barrel." No one denies that he has a "barrel," and our Irish fellow citizens know that he has put its contents to good purposes; that he gave \$50,000 to the starving poor of Ireland. Such men are the ones to have "barrels." Cleveland gave \$30 to the South Carolina earthquake sufferers, and \$10,000 to the Democratic National Committee to assist his re-election. There is a vast amount of difference between the Republican and Democratic National candidates, not only in respect to their benevolent feelings, but in their patriotic feelings. Harrison fought bravely in the Rebellion and won a General's commission, while Cleveland hired a substitute. Morton knocked in the head of his "barrel" to aid the Union cause, and Thurman declared in a Democratic Convention that the "War was a failure."

BOSK.

The Democracy say that "our manufacturers would find a limitless market" for their goods if the "War Taxes"—that is, the protective tariffs—were taken off. All both. If foreigners want our goods they will buy them, whether we have a Protective Tariff or not. If American manufacturers turn out a superior article, and as cheap as the foreign-made, which they can do, he foreigner will buy the American goods. People—American or foreign, will buy the cheapest and best. But, without our Protective Tariff we would have no goods manufactured for this "limitless market." The Democracy talk so glibly about.

Francis Murphy says he doesn't propose to help the Democracy into power by throwing away his ballot on the Prohibition candidate. This is the deliberate utterance of a man who has done more for the cause of temperance in this country than any other, with the possible exception of the late John B. Gough. Furthermore, he is wise enough not to place himself in a position in which he would be his own hands and part with his influence for the sake of trying to blister up an impracticable cause.

At Columbus, Ohio, on Saturday last, Thurman made a speech, in which he said: "God knows I would rather be at home with my dear old wife than in any office in the world." The old gentleman should not let that worry him one moment. For twenty-five cents we will insure him the Traveler's of Hartford, that during the four years from the 4th of March next he will not be kept away from that dear old wife five minutes by the Vice Presidency. It is cruel to keep him away now.

The Cotton-Bag Trust.—Mr. Gratz, of St. Louis, who is at the head of the cotton-bag trust, was examined on Saturday last by the Senate Tariff Sub Committee, and stated that the organization owed its origin entirely to the Mills bill, and that but for the introduction of that measure it would never have been thought of. Cotton-bag manufacturers were driven to combine in order to save their mills and machinery.

The surveyors will start out on Monday next to survey the route for the extension of the Carson and Colorado Railroad to Mohave. It is contemplated to start work in December and have connection made at Mohave about June next.

The American Party primaries of Inyo are to be held on the 29th, and the Convention on October 24.

AMERICAN CLOTHING.

Democratic orators, notably Thurman, and the press of that party, have much to say about the protective tariff adding to the cost of clothing. Mr. Thurman, in one of his speeches, intimated that there was a tariff of \$6 on cloth that cost in England \$10, making it cost in New York \$16, and that the American wearer had to pay that tax. That may be so, and if a dandy wishes to have his clothing made of English cloth, when we manufacture better cloth in the United States for less money, let him do it. A fool and his money are soon parted, and who cares? But our Democratic Free Trade friends do not tell their hearers and readers that the Protective tariff passed by Republican Congressmen caused woollen factories to be established in this country in competition with the English, and that the multiplicity of such establishments with the increased supply of wool in this country has brought about a competition which has reduced the price of cloths more than one-half. The Newburgh, N. Y., Journal publishes an interview with a woollen manufacturer of that city, who removed his factory from England on account of the tariff. In 1867 there was but one firm manufacturing such goods in the United States, and they were making money. At that time 54-inch cloth brought \$1 45 a yard. A competitor entered the field and within one year the price was reduced by competition to \$1 25. A third manufacturer came and a fourth quickly followed. All this time the Newburgh man was selling English goods in competition with American manufactures, until 1871, four years after his arrival, protection had caused the erection of four mills, a large capital invested, employment given to hundreds of working people, and prices on the goods reduced, until it became impossible for him to compete. And the reduction did not cease when foreign competition stopped, but the competition still went on and to-day, he says, a better article is sold for 70 cents than in 1867 was sold for \$1 45. This is what the tariff has done for one branch of business. This Newburgh man, as we have said, removed his factory from England in 1875. The first year they sold plushes, 54-inch, for \$1 05. To-day they sell equally as good for 64 cents. There are now five large establishments engaged in the manufacture and the price has been reduced one-half. Had we no protective tariff will our Democratic friends have the cheek to tell us that the English would have reduced their prices on such goods to the prices the American goods are now commanding? Not a bit of it. There would have been no inducement to American capitalists to launch into such enterprises, and the English would have reduced prices no more than their own competition might require, which would not be much, and our own people would be idle a greater portion of their time, or be compelled to work for low wages at menial employments. And this manufacturer says he is paying 45 per cent. higher wages in Newburgh than was paid in England. While the American workman receives better wages than they do in England he gives the figures to show that the American gets his beef, mutton, pork, coffee and tea for less than the Englishman, and there is very little difference in the price of other household commodities, but the great difference is in the manner of living. The American workman is enabled to have all the necessities and many of the luxuries of life, while the English workman is enabled to have but very few of the necessities—and those only in limited quantities, and none of the luxuries. And for these blessings the American workman is indebted to a Republican Protective Tariff. Our San Francisco woollen mills turn out as good, if not better, cloth than can be imported, and sell it at lower figures than the imported article. Nine-tenths of the people of the United States are wearing clothes of American manufacture from American wool, and are as well and comfortably dressed as are the one-tenth who may prefer to wear English goods and pay extra for the privilege of so doing. The tariff does not enhance the price of clothing to the workmen and other classes of our countrymen who are truly American in feeling, but on the contrary, through competition among our own manufacturers, they can dress as well as their millionaire neighbor, who prefers to dress in different material because "it's English, you know!"

Too Good.—The American citizen who is too good to wear clothing made of American manufactured material is too good for this wicked world. He had better die and become an angel. The best and most comfortably dressed women and men in California wear clothes of California manufacture.

Frank Hard, the Democratic Free Trader, of Ohio, says that the Democrats cannot hope to carry New York for Cleveland, and that they must look to the Northwest for electoral votes. That is a poor section to look for such articles.

Democrats harp considerably on taxing "raw material," and say that manufacturers should have "raw material." "Raw material" that can be grown or found in the United States should be protected.

It is thought that Cleveland will not write this letter until after the election, and then he can say that he was not running this year.

General Denby, our Minister to China, telegraphed to Washington that he has no information as to the action of the Chinese Government regarding the Chinese Treaty.

The Republicans have carried Vermont by 27,000 majority, and the Democrats have elected their Governor in Arkansas. Two very remarkable political events.

San Diego had a \$350,000 fire on Tuesday.

The Prohibitionists polled only 1500 votes at the election in Vermont on Tuesday.

MINING NOTICES.

Notice to Co-Owners.

TO JAMES W. LOCAL INTELLIGENCE.

Personal.

District Attorney Virden returned from San Francisco yesterday. Mrs. Virden returning with him from Carson.

Captain John Kelly, of the Bodie Co., was in town on Wednesday on business.

Supervisors Boone, Cresser and Hector, all candidates for a higher position, were in town this week, posing before the dear people, and all confident of being nominated at the Republican Primary to-day.

R. G. Montrose was over from Lundy this week looking after his prospects as a candidate for Sheriff at to-day's Primary.

THE EASTERN SLOPE FAIR.—The second annual fair of the Eastern Slope Agricultural Society will open at Bishop Creek, Inyo county, on Monday next, to continue four days, closing on the 13th. Had it been later this section would have been fairly represented. The District and Eastern Slope fairs will be of material benefit to all this section of California, if they can be so arranged as to enlist the sympathy of the agriculturist and stock raisers of Alpine, Inyo and Mono counties, and we trust that next year the dates of both will be fixed to accommodate the greatest number in the District to be benefited by the expositions, and that the people of Mono will be prepared to take a greater interest in them. By another year our stockmen should be able to exhibit some fine stock.

DEMOCRATIC COUNTY CONVENTION.—The Democratic County Convention will meet in Bryant's Hall on Wednesday next, the 12th, to nominate an Assemblyman and county officers. We understand that objection was made to the Convention being held in the Court House. There is an unoccupied Court room which should be used for such public purposes. The Republicans four years ago held their Convention in that room and we see no reason why the Democracy should not have the same privilege, unless the insurance policy forbids such uses.

THE WATKINS SUIT.—The first of the big water suits of Kierman & Riekey vs. N. B. Hunnewell et al., which has been occupying the attention of the Superior Court and our people during the past three weeks, is nearing the close. The arguments commenced this morning, and the case will go to the jury this afternoon. The second trial, the same plaintiffs versus The Virginia Creek Hydraulic Mining Company, is set for Tuesday next, and we may look for another three weeks' siege.

WITHDRAWN.—On the eve of the great Republican battle to be fought at the polls to-day the following withdrawals of prominent candidates are announced: W. H. Virden as a candidate for Superior Judge, and J. A. Cresser and Myron M. Waltz as candidates for Sheriff. This leaves a square fight between H. M. Eddy and J. E. Goodall for Superior Judge, and Sheriff Wat. Morgan and R. G. Montrose for Sheriff.

SMOKE.—The mountain atmosphere has been very smoky for the past two weeks, probably from fires started by sheep men who are leaving the mountains for their valley homes. The State authorities have issued a circular for transmission to Postmasters throughout the State in regard to such acts. The circulars are headed, "Fire, Illegal Timber Cutting," and contain a section of the Penal Code regarding such depredations.

BEST.—Republican candidates for county officers, and for Assemblyman, have been busy this week, securing the county, seeing their "dear" Republican friends. They are all sure of being nominated, but when the votes are counted this evening it will be discovered that many have "been left."

RECORDER'S OFFICE.—The following are the transactions of County Recorder Kierman's office for the past month:

PIZZAZZO.—The school house gate has been painted the National color—"red, white and blue."

A CARD.

On behalf of my invalid brother, Dr. Lloyd Goodnow, and myself, I desire to thank the citizens of Antelope Valley and Bridgeport for the many kindnesses we have experienced at their hands during his sickness, and while I have been closing his business; particularly to Mr. Thomas B. Riekey, who has been a true friend in all our business and social relations. My brother will accompany me to my home at Big Oak Flat, Tuolumne county, where he will pass the remainder of his declining life, and we wish our Mono friends every happiness and prosperity.

LINCOLN GOODNOW.

THE FUNDS.—The money in the County Treasury was counted on the 3d and amounted to \$33,750 45.

A MISTAKE.—The Hawthorne Bulletin of the 5th was mistaken in saying that the Republicans of this Assembly District had nominated Cyrus Coleman, of Alpine county, for the Assembly. The Republican Central Committee of Alpine nominated him. The Republicans of Mono will to-day nominate the candidate for this District by a popular vote of the party and he will be endorsed by Inyo, and should be by Alpine.

SENTENCED.—W. T. C. Elliott has been sentenced to be hanged at Independence, Inyo county, on September 21.

On Monday last, in the U. S. Circuit Court, San Francisco, Justice Field rendered the decision in the Sharon divorce case adversely to Sarah Althea, and enjoining her from interfering with the Sharon estate. Mrs. Terry was present and grossly insulted the Justice, who ordered the U. S. Marshal to remove her from the Court room. In obeying orders the Marshal was attacked by Judge Terry, who swore he would defend his wife. He knocked the Marshal down, but she was removed to another room, and Terry demanded admittance, which was refused, whereupon he drew an eight-inch dirk on the Marshal when there was a severe struggle between the Marshal and Deputies and Terry. He was at last disarmed, and later Justice Field sent the barely Judge to the Alameda county jail for 6 months, and his wife for 30 days. Sarah Althea had a loaded British building revolver in her satchel, and as she tried to open the satchel during the reading of the decision, it is thought she intended to shoot Justice Field. The distinguished offenders are comfortable in jail, and the Judge says he wants to "see Justice Field." When he gets out Field will probably be sung in Washington.

John Baker, while feeding a threshing machine near Agenda, Kas., was accidentally cut in the hand by the band-enter, a boy. He grasped the boy and fed him into the machine feet first. The boy's screams attracted the attention of the other hands, but before they could interfere the boy's body had half disappeared. The enraged hands seized Baker and hanged him to the straw-barn.

The Santa Cruz group of mines at Carson Hill, about six miles from Sonora, Tuolumne county, have been sold to an English syndicate, who will erect a 1000 stamp-mill.

The longest straight stretch of railway in the world is on the new Argentine Pacific Railway from Buenos Ayres to the foot of the Andes. For a distance of 211 miles the line is laid without a curve.

Republican meetings were held at all the principal places, and many others, in this State, on Saturday night last—the opening of the Republican campaign.

The smallpox is steadily increasing in San Francisco. If it keeps up its lick the interior counties may have to quarantine against the Bay City.

On Monday at Sheephead Bay, 45,000 people witnessed the Futurity race, and about \$1,000,000 changed hands.

On Friday next Goldenrod, the murderer of little Mamie Kelly, will get his deserts, but about three years too late.

San Francisco is to be honored with a visit from a troupe of Hula-Hula girls from Honolulu.

Over 1000 children are reported to have died of measles in Santiago, Chili, inside of two months.

Indianapolis had a \$1,500,000 fire on Sunday last. Eight firemen were burned to death, and many others injured.

It is said that the Pope is preparing to leave Rome and make a residence in Madrid.

A strange disease at Petaluma is carrying off large numbers of cattle.

It is said Thurman's speeches in Michigan have done the Democracy no good.

Minneapolis is to have a 28-story building.

The Inyo Republicans have their Primary election to-day.

Blaine is to make a number of speeches in New York.

MR. CO. CAN'T HELP IT.—Selling goods at cost. Salisbury will give all a fair show.

LADIES, when you go to Bodie, call on Salisbury and get your dress goods at cost.

Bound to go—Salisbury has a choice lot of shoes for sale at cost.

Typhoid fever is epidemic in Reno.

ENCOURAGING OUTLOOK.

Republicans in other States need take no stock in the reports that New York is hopelessly Democratic and given up by the Republicans, says a New York correspondent of the Boston Herald. Warner Miller is the standard bearer for Governor, the unanimous call of the party, and the farmers in every school district, with whom he is wonderfully popular, will rally to his support. Mr. Blaine will speak in all the manufacturing centers, where the labor vote is already deserting the Democrats, and every speech will tell in an increased Republican majority. Mr. Depew will work as he has never worked before, and his eloquent tongue will be heard all over the State. Thomas C. Platt, whose work for Garfield in New York city in 1880 saved the State to the Republicans, will again be in charge of the canvass in the city. He confidently expects that Cleveland will get 20,000 less majority in New York city and Brooklyn than in 1884. The friends of Arthur in these two cities who would not work for Blaine with any heart are all in line for Harrison. The Butler vote, which would have gone to Blaine and elected him four years ago, had Butler withdrawn, is certain to go for Harrison. Butler's followers have all protectionists, and this year there is every evidence that they are more firmly set against Cleveland than ever. With a conceded majority for Harrison in the State, outside of the two big cities, larger by 10,000 to 15,000 than that received by Blaine, and a reduction of Cleveland's majority in New York city and Brooklyn, in which there is every probability, to the extent at least 15,000, a Republican majority in the State of 20,000 to 30,000 is a claim for which there is a solid foundation.

The Grand Army Journal recalls the fact that Mr. Thurman in 1862, in addressing a Democratic State Convention in Ohio, said: "It would try the ethics of any man to deny that some of the Southern States have cause for revolution. The South are a brave people. The Southern States cannot be held by force. The blacks won't fight for the invaders. The Hungarians had less cause for complaint against Austria than the South against the North." According to the Grand Army Journal, also, it was Mr. Thurman who, in the Democratic National Convention in 1884, drafted the resolutions pronouncing the war a failure. This was while Harrison was fighting for his country.

Twenty-five Harrison and Morton clubs, with a membership of 3,000, composed entirely of men who voted for Cleveland in 1884, are enough, without any other change, to give New York State to the Republicans. This record of ex-Democrats will soon be surpassed, however. New York Democrats are getting very scarce outside of New York City.—N. Y. Mail and Express.

Our excellent Scottish contemporary, the Glasgow Herald, exultingly declares that, "with President Cleveland, Great Britain knows exactly where she is." This is strictly true. In November, with President Cleveland, Great Britain will be under the American Protectionist earthquake and begging to be dug out.

Judge Thurman says that his letter of acceptance was ready six days after the nomination, but that he has been waiting for the President the other sixty days. No one has yet stated what the President is waiting for; but it is supposed he is waiting to see how the election goes so that he can act with discretion in either accepting or declining.—Pittsburg Dispatch.

The turning from Cleveland to Harrison is well illustrated at Cambridge, Mass. The University Press employs about 90 legal voters. In 1884 they stood 30 for Blaine and 58 for Cleveland. Now they stand 67 for Harrison and 21 for Cleveland.

The great dry goods house of H. B. Claffin & Co., of New York, has 335 employees who will vote for Harrison and Morton. Of these 57 voted for Cleveland four years ago, three for St. John and one for Butler.

The free trader who "reduced" a dog one seventh, beginning at the nose, on the plea that a reduction from 47 to 40 per cent. could hurt nothing, found the owner unable to agree with him that the dog was "substantially" uninjured.

The Democratic rule, the simple plan for carrying the country, is to let the man from Texas with 128,647 majority revise the tariff for the candidate from New York, with 1,047 plurality. It is working like a charm—for the other candidate.

"We don't mean free trade, we only mean tariff reform," say the Democratic campaigners. In other words, they do not mean to turn the workingman out to tramp just yet; they will be satisfied this year with reducing his wages.—N. Y. Press.

Already over twenty-five Republican clubs, composed of men who voted for Cleveland in '84, have been organized in the State of New York.

Startling Discovery.—The discovery by the inhabitants of a locality hitherto unvisited by the pestilential scourge of fever and ague, that it exists in their very midst, is decidedly startling. Such discoveries are made at every season, in every part of the Union. Subsequently, when it is ascertained, as it invariably is at such times, through the valuable experience of some one who has been benefited and cured, that Hester's Stomach Bitters is a thoroughly efficacious eradicator of the malarial poison, and the means of fortifying the system against it, a feeling of more security and tranquility reigns throughout the whole neighborhood. Besides the febrile forms of malarial disease, dumb ague and ague cake are removed by the potent action of the Bitters, to which science also gives its sanction as a remedy for rheumatism, dyspepsia, constipation, liver complaint, debility, kidney troubles, and all the diseases impairing the organs of digestion and assimilation.

ABOUT PEARLS.

Their Purity and Beauty—Where They Are Found and Their Value.

Never have pearls been more popular or commanded such high prices as during the past ten years. At present nothing is considered in better taste than the pearl on account of its purity and subdued beauty.

This unusual demand has had the effect of greatly stimulating the search for them, especially on the west coast of Australia, at Thursday Island, the Soloo Archipelago, in Ceylon and the Persian Gulf, and also along the coast of Lower California. The demand included pearls of all colors, except the inferior yellow.

The fine black pearls from Lower California have been in great request, while ones bringing as much as \$1000. With these black pearls are found many beautiful gray and grayish brown pearls.

The great fisheries of the world produce fully \$1,000,000 worth annually, of which the lower California fisheries produce probably one-sixth. Kentucky, Tennessee and Texas have given us over \$1,000,000 worth of pearls per annum; their remarkable fresh water pearls, especially the black ones, which are unrivaled for delicacy of tint.

The finding of two bunches of these in the Turner group of mounds in the Little Miami Valley, Ohio, by Professor F. W. Putnam, gives us a faint idea of how plentiful they were before the arrival of the Europeans. But within the last five years many of the fancy colored pearls have received their variety of color not from nature, but by artificial means.—North American Review.

CIRCUMSTANTIAL EVIDENCE.

A Prisoner's Innocence Fully Proved, and His Release Effected.

An extraordinary case of circumstantial evidence occurred in a town on the banks of the Tennessee River several years ago.

Two travelers had gone to the hotel and were placed for the night in the same room, but in separate beds. The next morning one of them was gone and traces of blood were found from his bed to the river. It was believed that he had been murdered and thrown into the river, and the other traveler was arrested.

The accused denied his guilt and established an excellent reputation, and the fact that he had no object in murdering the man. Yet circumstances pointed so strongly against him that he was convicted of murder in the first degree, and the date of his execution fixed.

The case was, of course, published in the newspapers, and was soon the man who was supposed to have been murdered in New Orleans, where he was engaged in business. He lost no time in notifying the authorities and securing the release of an innocent man.

He said that during the night at the hotel he had been attacked by bleeding of the nose, and arising, had gone to the river to bathe his face and wait till the bleeding had stopped. While there a steamboat came along, and going aboard he proceeded to New Orleans. Thus were the tracks of blood from the hotel to the river accounted for.

THE DISCHARGE OF OBLIGATIONS.

A Disposition To Be Discouraged and One To Be Encouraged.

There are some who never pay money debts if they can help it. Their fear of the law or of social condemnation, or some other penalty, is needed to compel them; and, if these can be removed, or have lost their force, their debts will remain unpaid.

Others need no such motive. They not only promptly pay their dues, but they would be unhappy not to do so, even could they conceal the fact from the whole world.

The same difference is seen in all obligations. One heart will spring to meet and discharge them as soon as they are made fast; another discovers them with regret, and either fulfills them through some outside pressure or, if that be absent, leaves them unfulfilled.

Given the disposition to discharge obligations, and every new one that is revealed to the mind is a step upward in the life and value of the individual.

IMPORTANT ITEMS.

Below are several lines of goods which we can recommend as being of good value. All are in first-class condition, and are a part of our regular stock:

A model Boot, at a nominal price, is Hale's full stock calf boot at \$2 50—it is made of first-class tanning calf skin with sole leather innersole and counter. Sizes 6 to 10.

Ladies' white merino vests and drawers, silk bound, cut stitch, 44 cents each.

Ladies' Unbleached Balbriggan Hose, full regular made and extra long—price 10.2-3 cents per pair.

The STANLEY HAT, for gentlemen, is an exceptionally good article. It is a soft hat, raw edge and cord band, and comes in black, wine and nutria colors. It holds its shape well, and gives good wear.

GENTS all wool knit undershirts and drawers—made especially for us, Hale's brand being on every garment. The goods are heavy weight, cut full size and both shirt and drawers are ribbed at the bottom. Best value on the coast. Price \$1 50 per garment. Colors, scarlet and natural grey.

BOYS medium brown mixed cassimere suits, well made and trimmed; ages 10 to 18. Price \$6 50.

CHILDRENS knee pants suits in dark fancy broken plaid suitings. Ages 4 to 12. price \$2 50.

OUR TEN DOLLAR SUITS for men are of unusual worth. Same as suits usually sold at \$15. In light and dark colorings and checks. Sizes 34 to 42. Medium heavy weight.

SHE TOOK BEER.

A Cavalier Soldier Sells a Seller.

One of the "samplers" which line the northern side of Alabama street, was the scene yesterday of an amusing incident.

Seated at a table was a well-known New York drummer, a prominent lawyer and a prosperous shoe merchant.

These gentlemen were engaged in a pleasant conversation when in walked one of the female soldiers of the Salvation Army. She was attired in the regular uniform of blue, and carried under her arm a bundle of the *Dattle Cry*. As she walked along she distributed copies of the sheet.

Seeing what she evidently regarded as a trio of promising sinners at the table, she walked over to where the three gentlemen were drinking their beer. She tapped the New York drummer on the shoulder. He looked up in astonishment.

"Take this paper," she said, thrusting a sheet into his unwilling hand.

"Thanks," he replied.

"Now," said he, "won't you have a glass of beer?"

"Yes, sir, thank you," was the unexpected answer.

The astonished bartender drew a glass of foaming beer and handed it to the woman in blue. She took it, and the drummer placed a nickel on the counter.

The soldier held up the amber liquid a moment and looked at it. The beer was certainly tempting. What her intent was could not be divined. In a moment she snatched the question.

She walked to the front door and dashed the contents of the glass into the street. Then she began to preach a temperance sermon.

But the drummer was mad and would not hear it; and the others were mad, too.

She left the place as the New York drummer said:

"Give her three more beers."—*Atlanta Constitution.*

A SPORTIVE MAIDEN.

Her Graceful Frolics at the Seaside.

An afternoon at Rockaway revealed fresh possibilities of the summer girl. She was idly pouring sand from one hour to another, lying in a burrow on the beach under the shelter of a parasol overgrown with ribbons. She was a grown of some soft, thin, silky, white stuff, like a waist with a yellow riddle. On either side was a young man in knickerbockers and blazer. A third young man lay at her feet.

The folksome girl was content, but the young men were incited to wish each that the others were not there. One of them snipped a bunch of ribbons from the fluttering parasol, and bickering over the possession of the trophy assumed the small animation possible on a lazy August afternoon.

Snatching suddenly her ribbons from the last possessor's hand the summer girl plumped them to her cap and jumped to her feet. "The fellow's having," she laughed down at her recumbent admirers and ran for the water. They were after her in an instant, but before they wet their feet in the edge of the first wave she was well out beyond the line of breakers swimming with a splendid vigorous stroke. It was impossible to refuse such a challenge, and in they plunged, blazers, knickerbockers and all. She turned her head to look at her pursuers, and the bright ribbons notified them a saucy defiance from her head. On she went, swiftly and powerfully, and after her plunged the three young men. Two of them proved on the instant that they were no match for the girl. A stern chase was too long a chase for them, and they emerged on the beach, dripping objects in yellow and white stripes, discolored blazers.

The third swimmer gained on the girl. She was agile in eluding him in the water, turning this way and that and leading him amply chased, but a reach of a long arm finally captured the ribbons, and they swam back together to shore. The summer girl's white gown shell the water like a duck's feathers, she was prettier than ever with the salt water curling her hair in little rings. She ran up and down the beach once or twice, shook herself out and smiled on the young men. Two of them were starting for dry clothes, but the third sat down in the sand with the summer girl again under the ribboned parasol.

A SUPERSTITION EXPLODED.

The Foolish Custom of Killing Dogs to Escape Rabies.

The custom of killing dogs that have bitten people is, in the opinion of some doctors, a great error. The idea that the death of the dog, if he be kept, prevents against the development of hydrophobia is in their opinion, one of the most absurd superstitions that remain in this enlightened nineteenth century.

They argue that if a man has had the poison diffused through his veins it is immaterial whether the dog from which it was derived is dead or alive. The only good that can result from his death is the protection of the uninfected.

"On the other hand, if he is killed, and was not rabid, there remains the ineffaceable belief in the mind of the bitten man that he was. Very often his friends do not doubt but what the dog is suffering from hydrophobia, and the force of the belief upon another, coupled with the willingness of the victim to believe the worst possible of his case, often brings about the natural disease, and causes him to die the horrible death of the rabies.

If, instead of immediately killing the dog, unless there is no room to doubt his madness, he was chained up until his innocence of the terrible distemper was firmly established, it would have not only lives that may be lost through this fatal belief, but years of peace to all men that have incurred a bite from a dog.

Grandmother's Slipper.

The total abolition of that old-time institution, the "grandmother's slipper," is doubtless owing to the creation of the new order of knighthood, the juvenile bandit.

Shingles and old slipper had much to do with the proud civilization of the past.—*Richmond Star.*
